WFA SUSPENDS LIMITATIONS
ON SALES OF COTTAGE CHEESE

SAN FRANCISCO, Oct. 3---All quota limitations on the sale of cottage

cheese have been suspended for the period beginning October 1, the regional

Office of Distribution of the War Food Administration announced today.

Paul C. Adams, officer in charge of the dairy and poultry branch, said the move is made possible by plentiful supplies of roller process non-fat dry milk solids, thus permitting the utilization of more fluid skim milk in the manufacture of cottage cheese.

The action is expected to compensate partially for a drop in butter production at this season of the year, and to supplement available supplies of the rationed cheeses, Adams said.

Limitations on the distribution of other fluid milk by-products such as buttermilk and flavored milk drinks remain in effect, the quota being 100 per cent of the quantities delivered in the base month of June, 1943.

KRAUT PRICE SUPPORTED---WFA announced today it will support sauerkraut prices by reimbursing packers on any civilian sales made below existing support levels. The specified payments will fulfil a commitment made last March 4 to support this year's kraut cabbage crop at \$12 a ton to growers.

According to Donald E. Wilcox, Regional supervisor of the WFA fruit and vegetable branch, today's announcement follows that of the OPA which based price ceilings for the 1944 kraut pack upon the average prices actually paid by packers for cabbage, up to a maximum of \$22 per ton delivered at customary receiving points.

Wilcox pointed out that this basis for establishing ceilings does not mean an increase in the WFA grower support price above \$12, or imply any particular support of cabbage next year.

WFA TO RELEASE MORE CAN-CORN--The WFA today announced an additional 121,376 cases of 1942 pack canned corn is being offered for sale to original packers. The corn is packed 24 No. 2 cans to the case and is warehoused in the east and middlewest.

Charles W. Smith, western WFA regional director of food distribution, said stocks are being turned over where advantageous and are being replaced with food from the current year's pack. In addition, he said, commodities no longer necessary for immediate military or lend-lease use are being returned to civilian trade channels.
